

Item P14-0322

Delta II Arc Flash Harness

When a potential exists for a worker to be exposed to an arc flash, a standard harness is not recommended since it could flame thus causing the worker to lose their fall protection system. The webbing in our Arc Flash Harness is made of Nomex and Kevlar and has a 7,000 lb. rating. The back D-Ring, pass-thru buckles, and all hardware PVC Coated. Meets ASTM F887-04, OSHA, and ANSI Z359.1 standards.
