

Item P71-0901

Hougen Magnetic Drill - HMD904

This economical drill is lightweight and compact. Rear positioned controls are easily accessible and ergonomically designed. Feed handles can be easily switched to either side. A unique safety switch indicator tells the operator when the sensor is engaged, making the drill operational. **Uses Hougen "12,000-Series" Rotobroach™ Cutters.** A Vacuum Base is also available as an optional attachment that allows for drilling of non-ferrous materials including copper, aluminum, stainless steel, plastics, composites and thin material. **See [Selection Guide](#) for additional drill specifications.**
Carrying case included.
