

Item P14-0997

Masonite

Masonite is made using wood chips, blasting them into long fibers with steam and then forming them into boards. The boards are then pressed and heated to the finished product. The long fibers give Masonite a high bending strength, tensile strength, density, and stability. Perfect for floor and wall protection. Masonite is made using only natural ingredients - an environmentally friendly product.

Item	Description	Attributes
14-0979	4' x 4' x 1/8"	
14-0989	4' x 8' x 1/8"	
14-0947	4' x 4' x 1/4"	
14-0997	4' x 8' x 1/4"
