

**Item P16-0998**

**Proplex 700**

Proplex 700 is a semi-rigid, flame-retardant, twin-walled product available in sheets. It is lightweight and strong, but able to be bent around sharp angles, making it a very versatile temporary protection in lieu of Masonite or Plywood. When coupled with Hanger Pins it can be quickly installed and easily removed and replaced as needed. Conforms to curves and sharp angles, greatly reducing the need for cutting and taping. 100% recyclable, antistatic and flame retardant.
