

Item P15-1647
Ramset T4MAG Fastening System

The Power of the T4MAG allows you to consistently shoot where no other gas tool has gone before. The .125 diameter pin is specifically engineered to work in the toughest concrete and steel where other pins cannot perform. The T4MAG system delivers power that rivals other gas and powder systems. Settling aggregate is the biggest reason for overhead pin failure. With the T3's 1/2 steel pin you can even shoot into the web of steel. Lower pushdown force and shorter travel distance decrease user fatigue. The lithium-ion battery can drive more than 3,500 shots per charge. **Includes: (2) batteries, battery charger, safety glasses, and carry case.**
