

Item P10-0290
Top Grain Elk Welding Gloves

Top grain elk provides the best fit and feel in high heat welding conditions. 14" length protects hands and arms from sparks and splatter. Additional layer of foam on palm and back of hand provides added heat insulation. Weltd fingers and Kevlar® thread protect seams from sparks. Reinforced straight thumb for superior grip. Elk stays soft under high heat while foam / cotton lining provides added insulation.
