

Item P15-1534

TrakFast Tool by Ramset®

This fully automatic tool can drive up to 1 1/2" pins three to five times faster than a traditional powder actuated tool. TrakFast's magazine holds 42 pins. Once the tool is fired, the piston is automatically reset. Since there is no recoil, the tool absorbs the shock resulting in less operator fatigue. TrakFast uses a 6 volt rechargeable battery and a clean burning fuel cell, thereby eliminating the need for changing power loads. No licensing is required either. The gun's narrow nose and profile allows the tool to reach inside deep track (1 5/8" wide x 2" high). Applications include fastening plywood, furring strips, waterproofing material and all types of track including hat channel, deep leg, Z and J channel, as well as standard track to steel, block or concrete. With Ramset's TekPin, you can fasten metal-to-metal as well as metal to concrete without changing pins. **Includes battery, charger and carrying case. Please note: Fuel Cell must be ordered separately.**

Specifications	
Tool Length	17"
Tool Height	15 "
Tool Weight	7.5 lbs.
Maximum Capacity (pin qty)	42 pins
Maximum Capacity (pin size)	1 1/2"
Fuel Cell Capacity	1,000 shots
Battery Capacity	3,000 shots
