Item p15-6400

Belleville Washers

Belleville washers are used to maintain load or tension in bolted assemblies. High tension is maintained compensating for expansion of dissimilar metals such as electrical connection bolting or in wear situations. Designed to fasten compression lugs with switch gear. *Please note - Loads are approximate at full deflection*

Item	Description	Attributes
15-6400		Bolt Size: 1/4" Thickness: .018 Flat Load: 72
15-6401		Bolt Size: 3/8" Thickness: .028 Flat Load: 175
15-6402		Bolt Size: 1/2" Thickness: .062 Flat Load: 1,090
